Correct My English

One copy-and-paste prompt that corrects your English writing, explains every mistake in simple words, and keeps your own meaning - so you learn from each correction instead of just copying it.

Free student notes - Writing & English set

What this note is: a single shortcut, on its own, so you can save it, print it and use it in seconds. Copy the prompt on page 2 into ChatGPT, Claude, Gemini, Muse or any other AI chat, paste your own writing under it, and get a corrected version with the reasons explained.

The copy-and-paste prompt

Correct My English Works in: ChatGPT - Claude - Gemini - Muse

> Correct my English writing below. Follow these rules strictly:
> 1. First, give me the CORRECTED VERSION of my full text, with grammar, spelling and punctuation fixed.
> 2. Keep my meaning and my own words as much as possible - do not rewrite it in a completely different style.
> 3. Then list EACH MISTAKE one by one: show my wrong sentence, the corrected sentence, and explain the mistake in very simple words.
> 4. If a sentence is already correct, do not change it - tell me it is correct.
> 5. At the end, give me ONE IMPROVED VERSION that sounds more natural, and 3 short rules I should remember to avoid my most common mistakes.
> Here is my writing:
> [PASTE YOUR WRITING HERE]

Fill the bracket: replace [PASTE YOUR WRITING HERE] with your own paragraph, essay, letter or homework sentences - anything from 2 sentences to a full page.

How to use it, step by step

1. **Write first, yourself.** Draft your paragraph or homework in your own words before you open any AI chat.
2. **Paste the prompt,** then paste your writing where the bracket is, and press send.
3. **Read the corrected version** and compare it with your original, line by line.
4. **Read every explanation.** The list of mistakes is the learning part - do not skip it to save time.
5. **Write the corrected sentences again from memory,** in your notebook, without looking. This is what makes the rule stick.
6. **Note your repeated mistakes.** If the same mistake appears twice, that rule goes on your personal revision list.

> **Why the explanations matter:** a corrected page alone teaches nothing - you will make the same mistakes tomorrow. Understanding why "he go" becomes "he goes" is what changes your next piece of writing.

What it looks like in practice

You wrote: "Yesterday I go to market with my friend. He buy many fruits and we was very happy."

Corrected version: Yesterday I went to the market with my friend. He bought many fruits and we were very happy.

Mistake 1: "I go" -> "I went". The word "yesterday" shows past time, so the verb must be in the past form.

Mistake 2: "He buy" -> "He bought". This is also past time, so "buy" changes to "bought".

Mistake 3: "we was" -> "we were". With "we", "they" and "you", the past form of "be" is "were", not "was".

Improved version: Yesterday, I went to the market with my friend. He bought a lot of fruit, and we were very happy.

Rules to remember: 1) "Yesterday" means past verbs. 2) "We" takes "were". 3) Use "the" before a known place, like "the market".

Change the style - formal, simple or exam style

Add one of these short lines under the main prompt to change the correction:

Add this line	What changes
Make the corrected version formal, for a letter or application.	Polite, formal wording for school and office writing.
Keep the language very simple - I am in primary class.	Short sentences and easy words.
Correct it to board exam standard and mark it out of 10.	Stricter correction, with a score and the marks lost for each mistake.
Explain every mistake in Urdu as well as English.	Helps if you think in Urdu but write your exams in English.
Correct only spelling and punctuation, not grammar.	Useful for a final check before submitting neat work.

Use it honestly. Write your first draft yourself, always. If the AI writes the whole essay and you only copy it, your English does not improve - and in the exam hall there is no AI to help you.

Check the AI too. AI corrections are usually right, but not always. If a correction changes your meaning, ask the AI why, or check the rule in your grammar book.
