AI NOTES SERIES

Difficult Words Made Easy

12 copy-and-paste AI prompts that turn any hard word into a simple meaning, an Urdu meaning, a picture in your mind and sentences you can use yourself - for ChatGPT, Claude, Gemini and other AI tools.

By Shah Fahad

AI & Technology Innovator and Educator - Buner, Khyber Pakhtunkhwa, Pakistan

November 2026

These are practical study notes, written in simple English for students and teachers. Every shortcut in this set is a ready-made prompt: copy it, replace the words inside [square brackets] with your own topic, and paste it into any AI tool. The prompts are starting points for learning - the thinking, checking and final writing stay with you.

How to Use This Shortcut Book

Every student meets words that stop the whole lesson - a long science word, a hard English word in a story, a term in a maths question. This small book is about one skill only: **understanding difficult words**. It gives you 12 ready-made prompts that break any hard word open, step by step.

> **The golden formula: Role + Task + Details + Format + Level.**
> Example: You are my tutor (role). Explain the word evaporation (task) for a Class 8 student (level) using a drying-clothes example (details), in a small table (format).

Three steps, every time

- **Step 1 - Copy** the shortcut exactly as written.
- **Step 2 - Replace** every word inside [square brackets] with your own word, class or subject.
- **Step 3 - Paste** it into ChatGPT, Claude, Gemini or any other AI chat, then read the answer carefully and check it against your book.

What is inside

- **Prompts 1-3:** Meaning, word parts and Urdu meanings
- **Prompts 4-6:** Mind-pictures, example sentences and word families
- **Prompts 7-9:** Similar and opposite words, paragraphs and stories
- **Prompts 10-12:** Revision tables and testing yourself

Keep a small **word notebook** beside you while you use this book. Every time a prompt explains a word, write the word, its short meaning and one sentence of your own in the notebook. Ten minutes a day with that notebook builds a strong vocabulary in one school term.

The Word Detective Method

Before you open any AI tool, try these four steps yourself. A good detective looks at the word first - then the prompts in this book become much more powerful.

Step	What to do	Example: photosynthesis
1. Say it	Read the word aloud slowly, part by part.	photo - syn - thesis
2. Split it	Look for small words or parts you already know inside it.	photo = light, synthesis = putting together
3. See it	Make a picture in your mind that shows the meaning.	A leaf cooking its food in sunlight
4. Use it	Say or write one sentence of your own with the word.	Plants make food by photosynthesis.

> **One-line test:** if you can say the meaning in your own words and use the word in your own sentence, you have learned it. If you can only repeat the book line, use one more prompt from this book.

Which prompt for which problem?

- I do not know the meaning at all - **Prompt 1**
- The word is very long - **Prompt 2**
- I understand English but want the Urdu meaning too - **Prompt 3**
- I forget the word again and again - **Prompts 4 and 9**
- I know the meaning but cannot use it in a sentence - **Prompts 5 and 12**
- The exam is near and I have a full list of words - **Prompts 10 and 11**

Most of the tools named in this book have a free version that is enough for school work. If one tool is not available to you, the same prompt usually works in another one.

Difficult Words Made Easy

Prompts 1-3 - get the meaning clear: in simple English, in parts, and in Urdu.

1. One Word, Fully Explained

Best for: ChatGPT, Gemini, Claude

> Explain the meaning of the word [evaporation]. Give: 1) a simple meaning in easy English, 2) a meaning in Urdu, 3) two example sentences, 4) one picture I can imagine in my mind. I am a Class [8] student.

Tip: This is the master prompt for this whole book. Start here whenever a science or English word stops you in a lesson.

2. Break a Long Word Into Parts

Best for: ChatGPT, Claude, Gemini

> Break the word [photosynthesis] into small parts. Explain what each part means, then join the parts and give the full meaning in one simple line.

Tip: Long science words look scary only because they are built from small parts. Once you see the parts, the word is yours.

3. Urdu Meaning and English Meaning Side by Side

Best for: Gemini, ChatGPT, Claude

> Make a small table for these words: [absorb, release, surface, temperature]. Columns: Word, Simple English Meaning, Urdu Meaning, One Example Sentence. Keep every meaning very short.

Tip: Use this for a whole list at once before a test. Copy the table into your notebook by hand - writing helps memory.

Remember It and Use It

Prompts 4-6 - make the word stick: a picture in your mind, real sentences, and its whole family.

4. A Picture in My Mind for This Word

Best for: ChatGPT, Gemini, Claude

> Help me remember the word [gravity]. Describe one funny or clear picture I can imagine in my mind that shows its meaning, and one line I can say to myself to remember it.

Tip: The stranger the picture, the stronger the memory. Students remember a falling apple far longer than a definition.

5. Three Example Sentences - Easy to Hard

Best for: ChatGPT, Claude, Gemini

> Write 3 example sentences using the word [observe]: first a very easy sentence, then a school sentence, then a sentence like the ones in my [Class 9 Science] book. Explain the word in each sentence in brackets.

Tip: Reading the same word at three levels shows you how it grows from daily life into exam English.

6. Word Family Finder

Best for: ChatGPT, Claude, Gemini

> Give me the word family of [create]: the noun, verb, adjective and adverb forms. Give a simple meaning and one short example sentence for each form.

Tip: Exams often change the form of a word. Learning the family gives you four words for the price of one.

Words in Real Language

Prompts 7-9 - meet the word among other words: similar words, opposite words, paragraphs and stories.

7. Synonyms and Antonyms Made Simple

Best for: ChatGPT, Gemini, Claude

> For the word [rapid], give: 3 words with a similar meaning, 2 words with the opposite meaning, and one sentence for each word so I can see the difference. Use simple English only.

Tip: Do not learn a synonym list by heart alone. The sentences show you which similar word fits which place.

8. Spot the Word in a Real Paragraph

Best for: Claude, ChatGPT, Gemini

> Write a short paragraph of 5 lines about [a rainy day in my village] that uses these words naturally: [moisture, evaporate, condense]. Then underline each word and explain it in one line below the paragraph.

Tip: Words learned inside a story stay longer than words learned from a list. Ask for a new paragraph with different words tomorrow.

9. Make a Tiny Story Using This Word

Best for: ChatGPT, Gemini, Claude

> Write a tiny story of about 80 words that uses the word [courage] at least three times in a natural way. Keep the language simple for a Class [7] student, and keep the story interesting.

Tip: Read the story aloud once. Hearing the word in a story fixes both its meaning and its sound.

Revise and Test Yourself

Prompts 10-12 - turn a list of hard words into revision, and finish by using each word yourself.

10. Turn 10 Hard Words Into a Revision Table

Best for: Claude, ChatGPT, Gemini

> Turn these 10 words into a revision table: [paste your 10 words]. Columns: Word, Short Meaning, Urdu Meaning, My Example. For the My Example column, leave a blank line - I will write my own sentence.

Tip: Leaving the last column blank is deliberate. A sentence you invent yourself is remembered twice as well.

11. Test Me on Yesterday's Words

Best for: ChatGPT, Claude, Gemini

> Test me on these words: [paste your word list]. Ask me one word at a time. Wait for my answer. Tell me if I am right, give the correct meaning only after I try, and at the end tell me which words I should revise again.

Tip: This is studying, not copying. You do the thinking and the AI only checks you - exactly how revision should work.

12. Explain the Word, Then Ask Me to Use It

Best for: ChatGPT, Gemini, Claude

> Explain the word [hesitate] in simple English with one example. Then ask me to write my own sentence with this word, and check my sentence and correct it kindly.

Tip: The final step is the most important one in this book: a word is only learned when you can use it yourself.

Your Weekly Word Routine

You do not need hours. A short, regular routine with these 12 prompts builds vocabulary week after week.

Day	Ten-minute task
Monday	Pick 5 hard words from the week's lessons. Use Prompt 1 for each one and write them in your word notebook.
Tuesday	Use Prompt 3 to add Urdu meanings, and Prompt 4 to add a mind-picture for the hardest word.
Wednesday	Use Prompts 5 and 6. Read the example sentences aloud and learn one word family fully.
Thursday	Use Prompts 8 or 9. Read a paragraph or tiny story that carries your words in real language.
Friday	Use Prompt 10 to build a revision table for all the week's words, with your own sentences.
Weekend	Use Prompts 11 and 12 to test yourself. Note the words you missed and carry only those into next week.

Honest use - read this first. These prompts are for learning words, not for copying homework. Always write your final answers, essays and sentences in your own words.

Safety: never type your full name, CNIC number, home address, phone number, school login or any password into an AI chat. A word, a paragraph from a book or a topic is all a prompt needs.

Check every answer: AI tools can make mistakes, even with meanings. If a meaning looks strange, check it in your textbook or dictionary, or ask your teacher.

Golden rules for difficult words

- Never skip a hard word and hope. Stop, split it, and learn it - it will come again.
- Learn the meaning, the Urdu meaning and one sentence together, never the meaning alone.
- Your own sentence is the proof of learning. No sentence, no learning.
- A small notebook of words you truly understand beats a long list you only copied.

Words are the doors of every subject. Open them one by one, and the whole lesson walks in.
