Flashcards Maker

One copy-and-paste prompt that turns your notes into clean flashcards - one question on the front, one short answer on the back - ready to revise on paper, on your phone, or in an app like Anki or Quizlet.

Notes by Shah Fahad

AI & Technology Innovator and Educator - Buner, Khyber Pakhtunkhwa, Pakistan

Free student notes - Study & Summarising set

What this note is: a single shortcut, on its own, so you can save it, print it and use it in seconds. Copy the prompt on page 2 into ChatGPT, Claude, Gemini, Muse or any other AI chat, paste your notes or name your topic, and your flashcards are ready.

The copy-and-paste prompt

Flashcards Maker Works in: ChatGPT - Claude - Gemini - Muse

> Turn the notes below into flashcards for [CLASS / EXAM LEVEL]. Follow these rules strictly:
> 1. Make one flashcard for each important fact, definition, date, formula or idea - one fact per card only.
> 2. Write each card as: FRONT: a short, clear question. BACK: the answer in one or two short lines - no long paragraphs.
> 3. Number the cards and keep the wording simple, in my own textbook's words where possible.
> 4. Cover the whole topic - do not skip difficult parts.
> 5. Make [NUMBER] cards in total. If my notes are long, make more cards instead of making the answers longer.
> 6. At the end, list any important point from my notes that did not fit on a card.
> Here are my notes: [PASTE YOUR NOTES OR WRITE YOUR TOPIC AND CHAPTER]

Fill the brackets: replace [CLASS / EXAM LEVEL] with your class, for example "Class 8" or "Matric", choose a [NUMBER] such as 20 or 30, and paste your notes - or just write the topic, for example "Photosynthesis, Class 8 science, Chapter 3".

How to use your flashcards

1. **Copy them out or keep them on your phone.** Paper cards, a notebook split into front and back, or an app - the format matters less than using them daily.
2. **Read the front, answer aloud from memory.** Say the answer before you look. Guessing and struggling a little is what builds memory.
3. **Turn the card over and check.** Right? Put it in the "know it" pile. Wrong or half-right? Keep it in the "revise again" pile.
4. **Shuffle and repeat only the weak pile.** Do not waste time re-reading cards you already know well.
5. **Return the next day.** Ten minutes today, ten minutes tomorrow and ten minutes before the test beats one long session.

> **Why one fact per card matters:** a card with three facts on the back is a paragraph, not a flashcard. You cannot test half of it. Short cards let you find your weak points quickly - and fix only those.

What the cards look like in practice

Topic: photosynthesis, Class 8. This is the set the AI gives you:

Card 1 - FRONT: What is photosynthesis?

Card 1 - BACK: The process by which green plants make their own food using sunlight, water and carbon dioxide.

Card 2 - FRONT: Which gas do plants take in for photosynthesis?

Card 2 - BACK: Carbon dioxide.

Card 3 - FRONT: Which gas do plants release during photosynthesis?

Card 3 - BACK: Oxygen.

Make them easier, harder or exam-style

Add one of these short lines under the main prompt to change the cards:

Add this line	What changes
Put the cards in a table with two columns: Front and Back, ready to copy into Anki.	Gives you a clean copy-paste format for flashcard apps.
Make the questions very easy - I am learning this topic for the first time.	Simple starter cards that build confidence.
Add 5 difficult, exam-style cards at the end and mark them with a star.	Stretches toppers and shows where marks are won.
Write the fronts in Urdu and the backs in English.	Helps if you think in Urdu but write your exam in English.
For every formula or definition, add one example card.	Turns a memorised rule into something you can actually use.

Use them honestly. Flashcards only work if you answer from memory first. Reading the front and back together is just reading your notes again - it feels easy, but very little stays.

Check the AI too. An AI can occasionally write a wrong answer on a card, and a wrong card teaches you the wrong fact. Spot-check new cards against your textbook - your book is the final authority.
