Quiz Me Mode

One copy-and-paste prompt that turns any AI chat into a patient quiz teacher - it asks you one question at a time, waits for your answer, and never gives the answer away before you try.

Free student notes - Study & Summarising set

What this note is: a single shortcut, on its own, so you can save it, print it and use it in seconds. Copy the prompt on page 2 into ChatGPT, Claude, Gemini, Muse or any other AI chat, add your topic, and your revision quiz starts.

The copy-and-paste prompt

Quiz Me Mode Works in: ChatGPT - Claude - Gemini - Muse

> Quiz me on [TOPIC] for [CLASS / EXAM LEVEL]. Follow these rules strictly:
> 1. Ask me ONE question at a time and wait for my answer before asking the next.
> 2. Do NOT give the answer in the question, and do not reveal it before I try.
> 3. After each of my answers, tell me if I am right or wrong, and briefly explain why in simple words.
> 4. If I am stuck, give me a small hint first - not the full answer.
> 5. Mix the question types: some short answers, some multiple choice, some true or false.
> 6. Start easy and slowly make the questions harder.
> 7. Ask 10 questions in total, then give me my score, my weak points, and 3 things to revise again.
> Start with question 1 now.

Fill the brackets: replace [TOPIC] with your subject and chapter, for example "photosynthesis" or "fractions", and [CLASS / EXAM LEVEL] with your class, for example "Class 8" or "Matric".

How a quiz session runs

1. **Paste the prompt** into any AI chat and press send. The AI asks question 1 - nothing else.
2. **Answer from memory.** Do not look at your book first. Trying to remember is what makes the answer stick.
3. **Read the feedback.** Wrong answers come with a short explanation - read it before the next question.
4. **Stuck? Ask for the hint.** Type "hint" and the AI gives a small clue instead of the answer.
5. **Finish all 10 questions.** At the end you get your score, your weak points, and a short list of what to revise again.
6. **Revise the weak points, then quiz again.** A second round on the same topic is where the real improvement shows.

> **Why one question at a time matters:** if the AI prints all 10 questions with answers, you only read them - and reading is not revising. Answering one by one forces your brain to recall, which is the part that builds memory.

What it looks like in practice

Topic: photosynthesis, Class 8. This is the back-and-forth you will see:

AI: Question 1 of 10: Which gas do green plants take in from the air for photosynthesis?

You: Oxygen

AI: Not quite. Plants release oxygen as a result of photosynthesis. Think about the gas that humans breathe out - that is the one plants take in. Try once more, or type "hint".

You: Carbon dioxide

AI: Correct. Plants take in carbon dioxide and use it, with water and sunlight, to make their food. Question 2 of 10: ...

Make it harder, easier or exam-style

Add one of these short lines under the main prompt to change the quiz:

Add this line	What changes
Make the questions harder and add one tricky question.	For toppers and final revision before a test.
Keep the questions very easy - I am learning this topic for the first time.	Builds confidence at the start of a new chapter.
Ask only past-paper style questions for my board exam.	Practises the wording and style of the real exam.
Ask all questions in Urdu, but keep the science words in English.	Helps if you think in Urdu but write exams in English.
Ask 20 questions and do not explain until the very end.	A full mock test - closer to real exam pressure.

Use it honestly. A quiz mark only means something if every answer came from your own memory. Typing the question into a second AI, or copying from your book, gives you a score that lies to you.

Check the AI too. AI quizzes can occasionally mark an answer wrong by mistake. If a correction surprises you, check that point in your textbook before accepting it - your book is the final authority for your exam.
