AI NOTES SERIES - PROMPT SHORTCUTS

Summarise Any Chapter

One copy-and-paste AI prompt that turns any long chapter into a short, clear summary - in 5 lines, in bullet points, or as a one-page revision sheet. For ChatGPT, Claude, Gemini, Muse and other AI tools.

By Shah Fahad

AI & Technology Innovator and Educator - Buner, Khyber Pakhtunkhwa, Pakistan

November 2026

This is one shortcut from a series of separate student notes - one topic per PDF. Copy the prompt, replace the words inside [square brackets] with your own chapter and class, and paste it into any AI tool. The summary helps you understand and revise. The learning, checking and final answers stay with you.

A Good Summary Keeps the Point and Cuts the Rest

A chapter is long because it explains, repeats and gives examples. A summary is short because it keeps only what you must remember. Before you use any prompt, know the difference - it helps you judge whether the AI summary you get back is a good one.

Keep in the summary	Cut from the summary
The main idea of each section, in order	Long examples and stories that only illustrate a point
Key facts, names, dates, places and numbers	The same point repeated in different words
Definitions of important words	Side notes, introductions and filler lines
Causes, effects and steps in the right order	Details you can look up again in the book if needed

How to use this shortcut - three steps

1. **Copy** the master prompt on the next page exactly as written.
2. **Replace** the words inside [square brackets] - your class, your subject, and the chapter text itself. Paste the real chapter text; do not rely on the AI remembering your book.
3. **Choose a length** using the variants in this note, then read the summary against your book once before you trust it.

> **The one rule that makes summaries work:** always paste your own text. Type or photograph your chapter pages and paste the text in. A summary made from your actual book matches your syllabus. A summary made from the AI's memory may add facts your book never taught - or miss the ones your exam will ask.

Which tool should you use?

Any chat AI works: **ChatGPT, Claude, Gemini or Muse**. Claude and Gemini handle very long pasted chapters well. If your tool has a word limit, use the "in parts" prompt on the last content page of this note. The prompt matters more than the tool - the same words give a similar summary everywhere.

The Master Prompt

Copy this prompt, fill in the brackets, paste your chapter text at the end, and send. It asks for the summary in four useful parts, not one block of text.

1. Summarise any chapter - the master prompt

Best for: ChatGPT, Claude, Gemini, Muse

> You are my study tutor. Summarise the chapter text below for a Class [8] student studying [Science]. Give me: 1) the main idea in 2 lines, 2) a summary in 10 short bullet points in the same order as the chapter, 3) a list of important words with simple meanings, 4) all names, dates and numbers I must remember. Use simple English. Do not add facts that are not in my text. Here is my chapter text: [paste your chapter text]

Tip: Read part 2 first - it is your revision material. Parts 3 and 4 are what most students forget to ask for, and what exams test most.

Why this prompt works

- **It gives a level.** "For a Class 8 student" stops language that is too hard or too babyish.
- **It gives an order.** Asking for the same order as the chapter keeps cause before effect, so the summary still makes sense.
- **It protects the facts.** "Do not add facts that are not in my text" is the most important line in the prompt. Keep it in every version.
- **It asks for parts, not a paragraph.** Bullets, word meanings and a facts list are faster to revise than one long paragraph.

> **Make it yours in ten seconds:** change the class, change the subject, and change "10 bullet points" to the number you need. Everything else can stay exactly the same for every chapter, all year.

Choose Your Length - Five Variants

Same chapter, different jobs. Use the short versions for a quick look, and the longer ones the night before a test.

2. The 5-line summary - the quickest look

Best for: ChatGPT, Gemini, Claude

> Summarise this chapter in exactly 5 short lines. Each line must carry one main idea, in simple English for a Class [8] student. Do not add anything that is not in my text. Text: [paste your chapter text]

Tip: Best for the first five minutes with a new chapter, and for a last look before you walk into the exam hall.

3. The one-paragraph summary - for answers and introductions

Best for: ChatGPT, Claude, Gemini

> Write a one-paragraph summary of this chapter, about 120 words, in simple and correct English. Cover the beginning, middle and end of the chapter in order. I will read it to understand, then write my own version. Text: [paste your chapter text]

Tip: A paragraph summary is good practice for exam introductions - but always rewrite it in your own words afterwards.

4. The one-page revision sheet - for the night before

Best for: Claude, ChatGPT, Gemini

> Turn this chapter into a one-page revision sheet. Include: a 3-line summary, 5 key facts, 5 important words with meanings, one simple diagram described in words, and 3 questions I should be able to answer from memory. Text: [paste your chapter text]

Tip: Copy this sheet into your notebook by hand. Writing it once by hand fixes it in memory better than reading it three times.

Choose Your Length (continued)

5. The exam-focused summary - what will they ask? Best for: ChatGPT, Claude, Gemini

> Summarise this chapter for an exam. First give 8 short bullet points of the most important, most likely-to-be-asked points. Then list any definitions, dates or formulas I must learn by heart. Keep it in the order of my text and add nothing from outside it. Text: [paste your chapter text]

Tip: The AI cannot see your real paper - treat its choices as a smart guess, and still revise the whole chapter.

6. The simple-Urdu summary - understand it in your own language first Best for: Gemini, ChatGPT, Claude

> Summarise this chapter in simple Urdu that a school student can understand easily. Keep the important English words in brackets after their Urdu meaning, so I also learn the English terms. Give the main idea first, then 8 short points. Text: [paste your chapter text]

Tip: Understanding in Urdu first, then reading the English summary, is a strong method for students who think in Urdu.

A worked example - Photosynthesis

So you can see the method, here is the master prompt used on a familiar topic. The input was a short textbook passage about photosynthesis. The prompt asked for the main idea, 10 bullets, important words, and facts to remember. A good result looks like this:

Main idea: Green plants make their own food using sunlight, water and carbon dioxide, and release oxygen.

Summary points (short form): Photosynthesis happens in green leaves, in tiny parts called chloroplasts. The green colour, chlorophyll, traps sunlight. Roots take water from the soil; leaves take carbon dioxide from the air. The plant uses light energy to join water and carbon dioxide into glucose (its food) and releases oxygen into the air.

Words to remember: chlorophyll - the green substance that traps sunlight; chloroplast - the part of the cell where photosynthesis happens; glucose - the sugar food the plant makes.

Facts: Needs - sunlight, water, carbon dioxide, chlorophyll. Products - glucose and oxygen.

Notice: nothing in the result is new - every line was already in the passage. That is the test of a good summary. If the AI adds a fact your passage did not contain, cross it out and tell the AI: *Only use my text.*

Long Chapters, in Parts - and Checking Your Summary

Some chapters are too long to paste at once, and some summaries come back wrong. Both problems have a prompt.

7. Summarise a very long chapter in parts

Best for: Claude, ChatGPT, Gemini

> I will paste a long chapter in 3 parts. For each part, reply only: Part received. Do not summarise until I say: Now summarise all parts together. Then give me one summary of the whole chapter: main idea in 2 lines, then 12 bullet points in order. Part 1: [paste first part]

Tip: After Part 1, send Part 2 and Part 3 in the same chat, then give the instruction. This is how you summarise a full unit, not just one lesson.

8. Check and fix a summary you do not trust

Best for: ChatGPT, Claude, Gemini, Muse

> Here is my chapter text and a summary of it. Check the summary line by line against my text. Tell me: 1) anything in the summary that is NOT in my text, 2) any important point from my text that the summary missed. Then give me the corrected summary. Text: [paste text] Summary: [paste summary]

Tip: Use this whenever a summary feels too neat or mentions something you do not remember reading. Two minutes of checking protects your marks.

Your practice task

Take the chapter you are studying this week. Run the master prompt (Prompt 1) for a full summary, then the 5-line variant (Prompt 2) from the same text. Read both, check them against your book, copy the 5 lines into your notebook, and close the book and say them aloud in your own words. You have now read, checked, written and spoken the chapter - four touches, and that is why this shortcut works.

Use AI honestly. A summary is for understanding and revision. Learn from it, check it against your textbook, and write your homework and exam answers in your own words - that is what your teacher is marking.

Always check the facts. AI tools sometimes state a wrong date, name or number with full confidence. Your book and your teacher are the final authority.

Protect your personal information. Never type your password, CNIC number, home address, phone number, or photos of other people into an AI chat.
