Free student notes - Writing, English and Languages set

What this note is: a single shortcut, on its own, so you can save it, print it and use it in seconds. Copy the prompt on page 2 into ChatGPT, Claude, Gemini, Muse or any other AI chat, choose your topic, and your daily word list is ready.

The copy-and-paste prompt

Vocabulary Builder - 10 Words a Day Works in: ChatGPT - Claude - Gemini - Muse

> Give me 10 useful English words about [TOPIC] for a Class [CLASS LEVEL] student. For every word, give me exactly this:
> 1. The word, and what type of word it is (noun, verb, adjective).
> 2. Meaning in simple English - one short line.
> 3. Meaning in Urdu.
> 4. One example sentence from daily life that I can copy and learn.
> 5. One common mistake students make with this word, if there is one.
> Rules: choose words I will really use in school, exams and daily speaking - not very rare or difficult words. Keep the sentences simple and correct. At the end, test me: ask me to make my own sentence with 3 of the words, one by one, and correct my sentences kindly.

Fill the brackets: replace [TOPIC] with any topic you need words for, for example "school life", "weather", "health" or "science", and [CLASS LEVEL] with your class, for example "Class 8".

How to use your 10 words

1. **Paste the prompt** into any AI chat, choose your topic, and send it. Your 10 words arrive in one neat list.
2. **Read each word aloud.** Say the word, its meaning and the example sentence out loud - hearing your own voice helps memory.
3. **Copy the list into a notebook.** Writing by hand fixes words in memory far better than a screenshot you will never open again.
4. **Make your own sentence** for every word - about your home, your village, your school. Your own sentence is the one you will never forget.
5. **Do the end test.** The AI asks you to use 3 words yourself and corrects you. That small test is where reading becomes real learning.
6. **Revise yesterday's words** before asking for today's 10. Ten new words a day, revised once, is 300 strong words in a month.

> **Why 10 words a day works:** a big list of 100 words feels heavy and is forgotten in a week. Ten words, used in your own sentences and revised the next day, stay with you - small daily steps beat one big effort.

What it looks like in practice

Topic: school life, Class 8. Here are the first 3 of the 10 words you will get:

1. Assembly (noun) - Meaning: a meeting of all students and teachers together. Urdu: subah ki majlis / ijtema. Example: Our school assembly starts at 8 o'clock every morning.

2. Punctual (adjective) - Meaning: always on time, never late. Urdu: waqt ka paband. Example: A punctual student reaches school before the bell rings.

3. Borrow (verb) - Meaning: to take something for a short time and return it later. Urdu: udhaar lena. Example: Can I borrow your pen for one period? Common mistake: "borrow me a pen" is wrong - say "lend me a pen" or "let me borrow your pen".

Change the topic, level or focus

Add one of these short lines under the main prompt to change your word list:

Add this line	What changes
Give me words only from my chapter: [paste chapter text].	Every word comes from your own book - perfect before a test.
Make the words harder - I am preparing for a competitive exam.	Advanced words with more difficult example sentences.
Give me 5 words only, with two example sentences each.	Slower days - fewer words, learned more deeply.
Focus on verbs I can use in my daily speaking.	Action words you will actually say, not only read.
Revise me first on the words you gave me yesterday.	The AI tests your old words before adding new ones.

Use it honestly. Copying the AI's example sentences into your homework without learning the words helps no one. The marks come from words you can use yourself, in your own sentences, without help.

Check the Urdu meaning. AI Urdu meanings are usually right, but not always perfect. If a meaning feels wrong, check it in a dictionary or ask your teacher - and trust the dictionary.
